Year 6 Homework

Date given out: _____

Homework is due in by the next Wednesday.

This week's spellings: Term: _____ Week: _____

Maths – Measurement Conversions

In maths, we will soon be converting between different units of measure. For homework, we would like you to measure objects, or use the information on packets to demonstrate your understanding of conversions.

For example: You could draw a table and list the mass of food objects in your kitchen and convert from grams to kilograms. You could measure objects or rooms and convert between metres, centimetres and millimetres - BE IMAGINATIVE!

EXTENSION: Why not also try converting metric to imperial measurements and vice versa!

If you are stuck, use this template.

Food item	Weight in grams	Weight in Kg
Tesco Malted Milk Biscuits	200g	0.200kg

Food item	Amount in ml	Amount in litres
Orange juice	250ml	0.250l
