Digital Painting

- We can use digital devices to help us to draw and paint pictures.
- When we use paint programs, we can use tools to create different effects.
- We can draw in different ways, using the pencil tool, lines and shapes.
- We can also change sizes and colours.

More Complex Tools

 <p>This is the <u>fill</u> tool. It lets us fill a shape with a <u>colour</u> of our choice. <u>Be careful</u> though, if the shape has any gaps in it, the fill tool will colour everything else!</p>	 <p>This is the <u>spray-paint</u> tool. When you hold down the left button on the mouse, it is like you are spraying a can of spray-paint. With this tool, it is more <u>difficult to colour neatly</u>.</p>
 <p>The <u>line tools</u> help us to draw neat lines.</p>	 <p>The <u>shape tools</u> draw circles, rectangles, or squares. As we click and drag using the left mouse button, we make the shape <u>bigger and smaller</u>.</p>
 <p>When we want to <u>save</u> our painting, we should click on this icon.</p>

It works by <u>clicking and holding</u> the left mouse button over the areas to erase.</p>	 <p>The <u>undo</u> tool <u>reverses</u> the last thing that you did.
